### **WHY DRAKI HERO'S GAME IS SO SHORT?**

Draki Hero is a Z1 Lab experiment, and as such, it is a MVP that we are testing in order to decide if we continue working on it and adding different features.

### **FROM WHICH VERSION OF iOS DOES DRAKI HERO WORK?**

Any iOS Device with A9 chip or higher and running iOS 11 or higher.

### **WHY CAN'T DRAKI BE HIDDEN BEHIND OR UNDER AN OBJECT?**

Augmented Reality has one key restriction nowadays: occlusion, which means that you can not hide a character behind or under an object because this is transparent for the device.

### **HOW MANY PEOPLE CAN PLAY TOGETHER ON DRAKI HERO?**

From two up to many people as you want, divided on two teams: the Allies and the Explorers, but always using the same device

### **WHY IS NOT DRAKI HERO AN ON-LINE GAME?**

Another restriction Augmented Reality has nowadays is persistence. The data can't remain on different smartphones at the same time, so you can not create multiplayer scenarios in which several devices participate at different times.

### **IS THERE ONLY ONE CHARACTER TO PLAY WITH ON THE GAME?**

So far yes, the only character you can play is the little Dragon.

### **DON'T YOU HAVE ANY DRAKI MERCHANDISE?**

Not yet, but we really love Draki's universe, we will think about it.
